OVERALL VIEW

Stock Market Performance: The VN-Index closed at the end of March 2026 at 1,674.5 points, a decrease of nearly 11% compared to the end of February. The market continued its downward trend from late February into March, experiencing several sessions with significant losses; however, investor sentiment gradually stabilized afterward. Since late March, the VN-Index has begun a slight recovery.

Market Liquidity: In March, the average daily trading value reached 30,611 billion VND per session, a slight increase of 5.2% compared to February's level of 29,103 billion VND. However, liquidity in the final sessions of March only remained above 20,000 billion VND per session, as bottom-fishing cash flow remained quite limited during the deep market decline.

Global Stock Market Movements: Following the correction trend of the VN-Index, other regional markets also saw significant declines compared to February 2026: the SET (Thailand) fell by 5.2%, the TWSE (Taiwan) dropped by 10.4%, and the SHCOMP (Shanghai, China) decreased by 6.5%. Markets with deeper declines than the VN-Index included the JCI (Indonesia), down 14.4%, and the KOSPI (South Korea), which fell 14.7% compared to February 2026. The impact of the armed conflict in the Middle East has been substantial, exerting a negative influence on a global scale.

Outlook: The Vietnamese stock market underwent a sharp correction in March due to concerns over the armed conflict in the Middle East. However, from late March and early April, the VN-Index began a slight recovery following positive news regarding a ceasefire agreement and favorable developments in negotiations. Unexpected negative events that cause the stock market to correct or rise sharply are quite frequent. Investors should avoid panic selling and losing sight of their long-term investment goals; instead, value investing and maintaining long-term patience based on an understanding of the market and businesses remain effective investment methods during periods of market volatility.

Note:

DFVN has selected VN100 TRI-a total returns benchmark as benchmark for claiming compliance with GIPS (find details in GIPS Report in next page). Additionally, the Fund's investment objective is to generating better growth than Vietnam stock market represented by VN-Index which is a normally and widely used price-only benchmark.

- DFVN claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. DFVN has established policies and procedures for complying with all the applicable requirements of the GIPS standards. DFVN has not been independently verified.
- Dai-ichi Life Vietnam Fund Management Company Limited (DFVN), as the firm, was established and operated since February 2014, formerly in the Investment Department of Dai-ichi Life Insurance of Vietnam Ltd., which is one of the first foreign-owned Life Insurance companies established in Vietnam. The Firm includes all funds under management; and all fee paying discretionary and non-discretionary portfolios. DFVN manages Entrusted portfolios of Dai-ichi Life Insurance Company of Vietnam Ltd., DFVN also manages Broad Distribution Pooled funds. There are 02 Open Ended Funds, DFVN Capital Appreciation Fund (DFVN-CAF) and DFVN Fixed Income Fund (DFVN-FIX).
- The DFVN Capital Appreciation Fund invests into a diversified investment portfolio including listed equities with large market cap on Vietnamese securities market. Under normal market conditions, the Fund will invest 50- 100% of its net assets in listed equity on Vietnam Stock Exchange, the equity about to be listed and the shares of the equitized corporation.
- The VN100 is a free-float adjusted market capitalization weighted index which measures the performance of the top 100 largest and most liquid stocks listed on the Ho Chi Minh Stock Exchange (HOSE). The VN100 Total Return Index ("VN100 TRI") is provided by HOSE on daily basis. DFVN has selected VN100 TRI as benchmark for claiming compliance with GIPS.
- VN-Index is a price-only benchmark presented in addition to a total return benchmark VN100 TRI. VN-Index is labeled as Supplemental information in GIPS Report.
- Valuations are computed and performance is reported in Vietnamese dong. Valuation policy, calculating performance, and preparing GIPS reports are available upon request.
- Fund returns include net and gross returns. Total fund fees include transaction costs, management fee, others administration fee. For gross return, DFVN adds back monthly expense ratio (TER) to the net return. The pooled fund expense ratio is the ratio of total pooled fund expenses to average net assets and reflect transaction costs. The management fee is maximum of 1.5% per annum and may decrease time to time due to AGM's decision. Please see the Fund's prospectus for additional details. The total expense ratios as of the Fund's most recent fiscal year end (31 Dec 2024) was 1.94%.
- Gross returns were used to calculate the three-year annualized standard deviation of the pooled fund.
- A list of pooled fund descriptions is available upon request.
- The Fund has an inception date of 03 Jan 2019, the date on which the Fund began operations
- The three-year annualized standard deviation measures the variability of the Fund and the benchmark returns over the preceding 36-month period. DFVN uses monthly Gross returns to calculate the standard deviation.
